ADVANTAGE TIME VALUE

A global footprint and
the LOTS advantage
in cargo expediting.

LOTS International Limited

LOTS International has been set up and spearheaded by a team of dedicated maritime professionals. The primary role of this division has been to appreciate and address the various problems and concerns facing ship owners and operators at ports across the world. To this end, Lots International has consistently provided the services of Port Captains with the express onus of significantly improving voyage profits to the ship owner and charterer.

Effective Cargo Superintendence through competent Port Captains has positively impacted ship handling both at the load and discharge ports. With over twelve years of dedicated service, Lots International has gained invaluable experience and understanding of port requirements in some of the most difficult ports around the world. With Lots International, you can be sure of a quick turnaround of vessels imports, hassle free load and discharge and an efficiently co-ordinated interaction with port agencies and personnel.

Cargo Expediting can never be deemed complete without competent documentation procedures and a good working relationship with the major PVO's across the globe. Lots International has successfully accomplished all this and much more. Till date, Lots International has successfully handled over 20 different types of vessels and over 3.5 million tonnes of cargo worldwide.
